

Title: Field Engineer

Job Description:

Unicom Technology, Inc. is an established, rapidly growing defense contractor/systems integrator providing turnkey solutions to the federal and commercial market. We provide a broad range of solutions and professional services that address critical organizational needs, such as enterprise converged networks, network security, physical security, VoIP, data centers, and data transmission systems.

We are looking for a Field Engineer, preferably with military experience and either a current Top Secret clearance or the ability to obtain one if necessary.

Duties & Responsibilities:

- Install, configure, troubleshoot, repair, and perform preventative maintenance on complex communication systems and ancillary equipment
- Develop and/or review designs by extracting and analyzing a variety of engineering data
- Follow EIP and testing procedures
- Conduct training for end users
- Obtain and maintain required certifications
- Maintain high industry, product, service knowledge

Required Qualifications:

- 7+ years experience
- Must have experience with Alcatel 7470 and 7270 ATMs and Alcatel 3600 Series bandwidth management
- Knowledge of Cisco routers and switches a plus
- Ability to continually learn new complex systems
- Extensive overseas and domestic travel required (50% travel)
- Military experience preferred
- Ability to obtain and/or maintain Top Secret clearance if required
- Excellent written and oral communication skills
- Excellent interpersonal skills

Unicom Technology is an Equal Opportunity Employer with a strong commitment to supporting and retaining a diverse and talented workforce.

Unicom Technology offers competitive compensation and benefits as well as great long-term career opportunities.
